

a better estimator

`\www\tutorial\real_estate2.py`

on your own

edit `real_estate.py` in directory:
`www/tutorial`

Note: the full path is `/home/pydata/sandbox/www/tutorial`

case of the missing jinja2 syntax

Add the following to `missing_index2.html`

```
{% endif %}

                                {{ sqft }}

{% endif %}

                                {% if location %}
                                {{ valuation }}
{% block main %}
                                {% if valuation %}
                                {{ location }}
                                {% endblock main %}
{% extends "layout.html" %}
```

with your neighbor

Take turns explaining client/request and server/response.

Name as many jinja2 statements as you can.

Identify the essential parts of an interactive flask web app.
